

Live surgery course

TOMMASO GRANDI
EDUCATION

ONE TO ONE **LIVE** 

Learn Live. Discover Everything.

Stand beside me during live surgery and interact in real time to understand every decision and every step of my workflow.

New Surgical Hub

Welcome to the new Surgical Unit at Tommaso Grandi Dental Clinic. Here, implantology is performed in a cutting-edge hospital-grade setting. You step into the operating room, observe my workflow, and understand why every detail matters. If you're ready to take your skills to the next level, this is the place.

2 hospital-grade surgical rooms

High-efficiency air filtration, medical gases, and airtight negative-pressure doors to maintain a controlled sterile environment.

Doctor prep room + patient prep room

Separate pathways for total control.

Recovery lounge

Reclining chairs for safe post-sedation recovery.

+ 6.200 implants/year

Over 900 immediate-load full-arch restorations per year

Protected pathways and protocols

Greater safety for both you and your patient.

Advanced implantology technologies

3D diagnostics and computer-guided surgery.

What will you really do?

You're not just coming to "watch" a live surgery.

You're coming to experience it inside a clinic built for advanced surgery.

I perform surgery on a patient under conscious sedation, one-to-one.

You observe every decision, ask anything in real time, and leave with a solid, proven protocol you can replicate

Scrub in

Hand washing, gowning, and sterile protocol: you step into the method

Walk in

Enter the operating room and discover the setup: workflow, air control, safety, organization.

Prepare

We set up the case: patient, surgical field, protocol, and guided surgery.

Observe

Live surgery on a real patient: full arch and management of critical steps.

Ask

Stop me, ask, clarify: I answer you as it happens.

Take it home

You leave with the steps, clinical reasoning, and workflow: a protocol you can replicate.

Practice

It doesn't end here: with co-treatment, you can come back and operate with me.

During this one-to-one course, you'll see how I manage patient comfort and safety throughout the entire procedure, with continuous monitoring under conscious sedation and a dedicated clinical protocol.

Procedures you may observe
(selected based on diagnosis):

- Full Arch**
- Pterygoid implants**
- Trans-Sinus implants**
- Zygomatic implants**

What do they say about the course?

“

With every step he takes when approaching complex cases, there is so much to learn.

His way of approaching these complex cases is quite amazing!

”
